# NOOSA TRI™ 14

The NOOSA TRI™ 14 shoe remixes archived inspiration with a sock-like fit. It's formed with a lightweight construction and an efficient ride underfoot. Bold colours and patterns on the engineered mesh upper are inspired by the early GEL-NOOSA™ styles from the 2000s. Convenient features, like the heel pull-tabs and toggled laces make the shoes easier to put on. This makes it more practical after exiting the swim stage of a triathlon or getting out the door quicker. With GUIDESOLE™ technology underfoot, these shoes help reduce ankle flexion. Its curved design allows you to conserve more energy while experiencing an easy forward roll.

# FEATURES

- FLYTEFOAM™ cushioning provides lightweight impact absorption
- GUIDESOLE™ technology helps conserve energy by reducing ankle flexion
- Engineered mesh upper improves breathability
- AHARPLUS™ outsole improves durability
- Sockliner is produced with a solution dyeing process that reduces water usage and carbon emissions
- Full-ground contact design creates a smoother and more efficient ride
- Toggled laces make it easier to personalize the shoe's fit
- Heel pull tabs makes the shoes easier to take on and off

# TRABUCO™ MAX

Energy savings are an important component for trail runners traversing across long distances, which is why we applied GUIDESOLE™ technology to the TRABUCO MAX™ trail shoe. GUIDESOLE™ technology is a sole construction that consists of a responsive toe spring that's scientifically proven to save energy over the long run. Thanks to the reduced load placed on the limbs from foot-strike to toe-off, this technology gives trail runners more potential to run further. Reaction is a necessary component for running off-road, which is why we have incorporated ASICSGRIP™ technology in the outsole. This rubber compound is functional for providing traction, especially amongst wet and slippery conditions. Adding 28mm of FLYTEFOAM™ technology under the heel and 23mm under the forefoot, this shoe provides excellent cushioning. The combination of a smooth forward rolling motion, improved cushioning, and better traction makes the TRABUCO MAX™ shoe a great training partner for a variety of trail running workouts.

# FEATURES

- GUIDESOLE™ technology helps conserve energy
- FLYTEFOAM™ technology cushioning
- ASICSGRIP™ outsole improves durability
- ORTHOLITE™ insole provides soft step-in comfort
- Breathable mesh upper
- Gaiter system
- 3D print upper improves support
- Toggled speed lacing system

# GEL-SONOMA™ 6 G-TX

The GEL-SONOMA™ 6 G-TX running shoe is designed for the great outdoors. Taking inspiration from the ASICS trail running family, this shoe is a versatile offering that’s functional for trail runs, light hiking, and other outdoor adventures. We also used fewer resources to colour the sockliner for a more sustainable design approach. This updated version of our trail shoe is complemented with a GORE-TEX™ upper to help keep feet dry in wet conditions.

The focus this season was to improve the fit of the upper, so we implemented a new last design that provides a more secure midfoot and heel fit, while the wider toe-box allows the toes to spread out. The synthetic stitching on the overlays is designed to improve durability while also helping feet stay secure and reduce slipping.

Underfoot comfort stems from a full-length AMPLIFOAM™ midsole and GEL® technology cushioning unit that’s placed where runners need the most impact absorption. To increase the softness with every step, we’ve included an ORTHOLITE™ sockliner for excellent comfort. Additionally, the multi-directional grip outsole improves traction on a variety of surfaces.

All of these comfort components are complemented by durable properties, such as the solid rubber outsole—making this shoe a versatile choice for the trails.

# FEATURES

- GORE-TEX™ upper helps repel water
- AMPLIFOAM™ technology cushioning
- GEL® technology cushioning provides excellent shock absorption
- Solid rubber outsole
- ORTHOLITE™ sockliner provides soft step-in comfort
- Sustainable sockliner dye

Designed with a kid's-specific last, these shoes offer a more accommodating fit for growing feet. Lastly, this style includes a solid rubber outsole, a medial wrap-up, and toe rubber stitching to improve durability.

# FEATURES

- Breathable mesh upper
- GEL® technology provides good shock absorption
- E.V.A cushioning
- Kid's specific last creates a more accomodating fit
